Description A unique one previous registered lady owner, two-tone de-luxe 1960 Anglia 105e saloon that has covered less than 22,000 miles from new and complete with old MOT's to verify the low mileage. This superb example was built in the first six months of Anglia production and has many features not found on subsequent later models. The car is fitted with a rare, all steel sun visor, a genuine Ford push button radio, seat belts, wing mirrors, wheel trims, bumper over-riders, locking petrol cap and exhaust trim. It is complete with its original jack and wheel brace still in their tool bag in the boot plus original owner's handbook. The car has been under sealed from new and has been dry stored for at least the last 26 years, the car has been used sparingly and serviced by the current owner. The bodywork and paint are in very good condition and the interior complete with original rubber floor covering is excellent. Mechanically the car is in fantastic condition too, the 997cc engine running beautifully smooth, quiet and pulling well. The car is in exceptional, original condition with everything working

perfectly. Comes complete with lovely history file. A rare opportunity to own such an original Anglia in such good condition. A very reluctant sale.
