Description PA Motorsport are pleased to offer our new product. The new PA hub flange is a direct replacement for the standard Imp hub flanges as used on many racing cars. The originals can suffer damage easily often causing excessive brake disc 'run out'. Our new hubs are made from high quality material and offer a direct, quality replacement to the standard Imp originals. These can be used in conjunction with our popular, high quality, Imp stub axles which feature a left-hand and right-hand thread to prevent hub nuts from coming undone. We also offer replacement driveshafts for the standard Imp item which is stronger and lighter than the original. A stock of universal joints for these stub axles and driveshafts is also held. To order please contact PA Motorsport on info@pamotorsport.com
