Description Our own Caterham is available for Track Day hire and driver coaching. We are able to arrange days for novice drivers to experience track driving for the first time in a relaxed and friendly environment, either individuals or small groups. We provide the car with an experienced Race Instructor with a full intercom as well as on board camera to record your drive and even add data logging for current race drivers looking to improve if required. Ideal for drivers wanting to gain experience prior to undertaking an ARDS test or for drivers looking for coaching before testing or racing a single seater. Alternatively, a fun way to experience track driving for the first time driver or small groups. Please contact info@pamotorsport.com for more details and availability
